DETAILS:

The height-adjustable design ranges from 500mm - 900mm and means that it can also be easily accessed by wheelchair users as well as children ranging from 3 to 11 years old.

The bright and fun child-friendly designs make their new hygiene routine fun and engaging.

Designed with no sharp edges, making this hand sanitiser station a child-friendly solution, perfect for use in schools, nurseries, soft play centers, playgroups, and other children activity centers.

Choose from two fun designs - hands or hippo. If you do not wish to have a pre-printed design, the hand sanitiser stand will be supplied with a blue glossy powder-coated finish.

The height is adjusted using a simple slider mechanism which can be tightened by hand at the rear of the unit in four different fixing points for height flexibility.

For added safety and stability, the children's hygiene station has a secure linking chain that can be attached to the wall for use in high traffic environments or where the unit is not supervised.
