

HOW TO MEASURE YOUR DESK FOR A DESK SCREEN

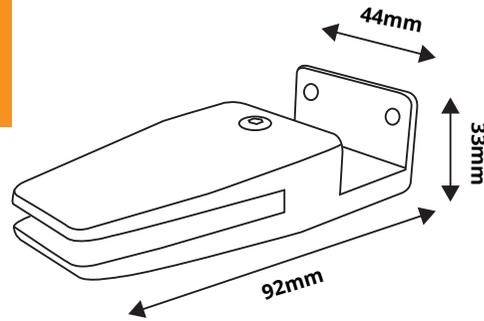

For EASYFIT Perspex Desk Screens

To ensure that the desk screen you order fixes to your desk correctly it is important that you measure your desk correctly. This guide is for our EASYFIT Perspex Office Desk Screen Ranges. For other ranges please see the relevant guide.

This EASYFIT sneeze screen can be effortlessly attached to any desk or counter top up to 26mm thick without the need for screws.

If your desk is more than 26mm thick please contact us on **01733 511030** for other clamp options. Please note, there may be a charge for substitute clamps.

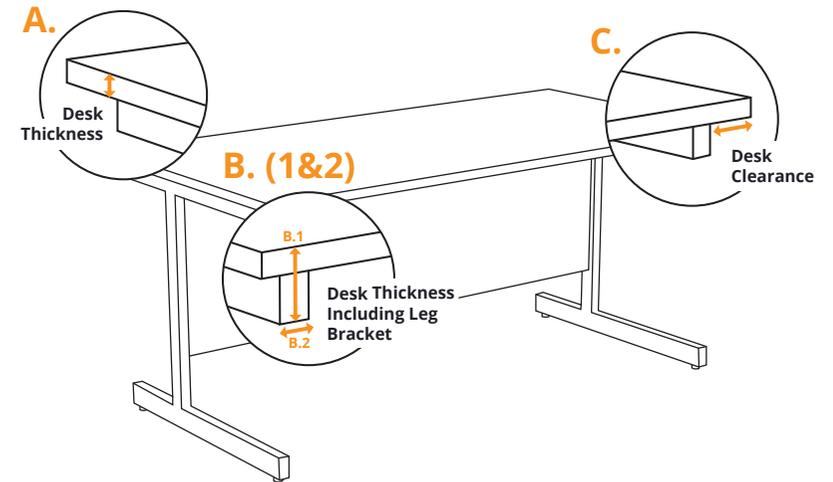

CLAMP DIMENSIONS:

DESK MEASUREMENTS

Please provide measurements for sections **A**, **B (1&2)** and **C**.

For assistance call us on **01733 511030**

CLAMP POSITION:

EASYFIT Desk Screens have clamps that can slide and be positioned anywhere along the bottom of the screen (as long as your tabletop thickness doesn't exceed the maximum measurement of 26mm). As the clamps are not in a fixed position, if you encounter an obstruction, simply slide the clamp along the bottom of the screen/desk and position it in a more suitable location.

For This Example:

There is an obstruction of a leg bracket along the desk which exceeds the maximum clamp opening. Therefore the clamps will need moving to a more suitable location in order to mount the screen securely.

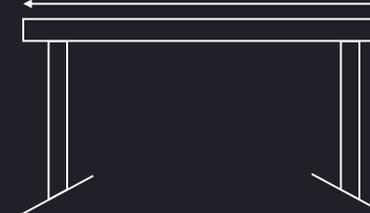

Back View of Desk - Ensure No Obstructions

1000mm and Above

Mountable anywhere along the base of the screen

1000mm or Above

Side View Of Desk

1000mm or Below

Mountable anywhere along the base of the screen

1000mm or Below
