DETAILS:

Our Premium Floor Standing Sanitiser and Hygiene Station is a complete, free-standing cleaning station that can be placed anywhere you where you have employees or customers passing by.

This highly effective sanitiser station can be placed in high-traffic locations and can be easily moved to any location it is needed. It benefits from easy clean surfaces that can be regularly disinfected to maintain a hygienic sanitising stand.

Ideal for doctors, NHS medical centres, pharmacies, hospitals, and emergency rooms. It provides a complete mix of

necessary protective PPE equipment that can be quickly and easily dispensed in busy environments.

Supplied with a hand gel dispensing area located at the top with a PPE glove dispense box. It also includes a large shelf that can hold a paper towel roll and a waste bin underneath that can be used for disposing of used gloves and paper tissues.

The A4 poster snap frame can be used to communicate your safety and hygiene instructions to passers-by or NHS Track & Trace QR codes. Add a customised logo or message to the lip of the display for extra impact. Please note this is not included.
