

RETRACTABLE BELT BARRIERS SILVER POST

Three Safety Belt Colours. Ideal For Pedestrian Guidance, Safe Social Distancing & Queue Management

Our Retractable Belt Barriers can be used as a pedestrian guidance system, to integrate social distancing and to manage queues and the flow of foot traffic.

Manufactured from a durable steel frame in a polished silver finish with a choice of three belt colours - blue, black and red.

Each belt barrier post is supplied with a 2m long retractable webbed belt and three additional connection points giving you 4-way connectivity from every stanchion post with tamperproof mechanisms.

The rubber, non-slip base prevents damage to the floor when moving.

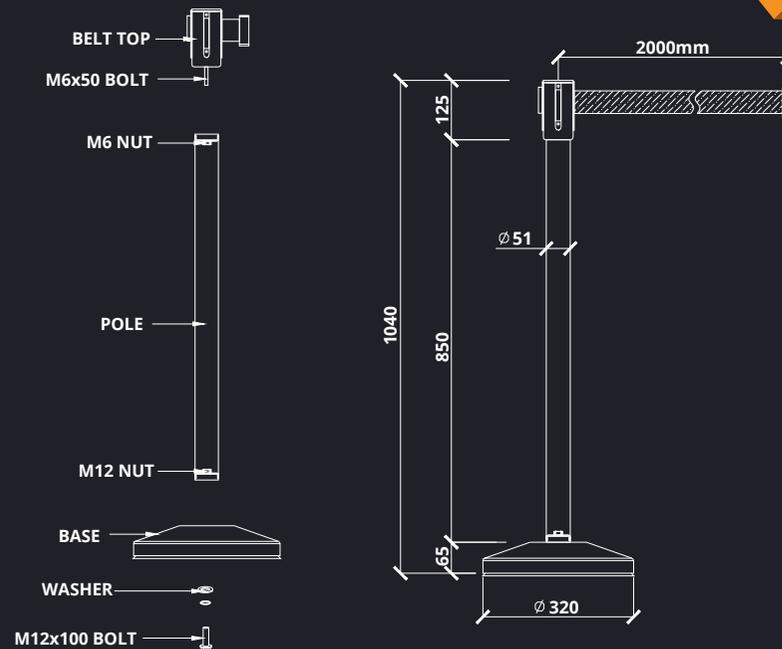

Our retractable queue barriers are easy to transport, require simple screw-in assembly, and can be quickly and easily deployed where needed.
