DOUBLE SIDED GRAPHICS.

You can utilise the same design or have a different artwork on either side, which can attract attention from multiple directions.

TWO BANNERS IN ONE.

TRITON™ Double Sided Banner is a versatile display stand that is two banners in one for indoor or outdoor use.

EASY TO ASSEMBLE.

To assemble just pull up both banner graphics from the base and secure with the hanger system at the top of the bungee pole.

CARRY BAG INCLUDED.

To aid storage and transportation between events TRITON™ Double Sided Banners are delivered in a padded carry bag.

SPRING LOADED POLE.

TRITON™ Banner has a robust telescopic spring pole that allows the banner to bend and sway with the wind making it more windproof.

WIND RESISTANT BANNER.

TRITON™ outdoor roller banner is supplied with ground pegs, for additional wind resistance in inclement weather.

GROUND PEGS INCLUDED.

Twin feet and ground pegs give additional stability if your banner stand is used on grass or soft ground.

REMOVABLE FEET FOR INDOOR USE.

Indoor exhibition display use does not require the twist-in stabilising feet, allowing a sleek, modern pull up banner base for indoor advertising.
