- 3 Year Commercial Warranty

DETAILS:

The Wall Mounted Digital Sanitising Station is ideal for areas where hygiene is key and handwashing facilities are not available. The 22-inch digital screen allows you to display marketing material and COVID-19 related information and instructions along with sound that plays via the integrated speakers.

The automatic dispensing unit provides a contact-free sanitising solution, easy refills, and a sanitising level indicator so you can easily see when hand-gel is running low. Simply place your hand under the dispenser and it will automatically dispense a measured dose of anti-bacterial gel. The dispensing valve is non-drip, non-spray, and non-clog.

The complete unit is manufactured from a durable steel frame in a white powder coated finish. All surfaces are easy to clean and can be regularly sanitised. The removable drip tray means there will be no spillages on the floor and can be easily cleaned when needed.

This commercial-grade hygiene station can be used 24-7 and is designed to be in constant use in high-traffic, busy locations.

The user-friendly, cost-effective online content management software can display a combination of different media such as images, videos, web pages and can also display social media feeds, scrolling text and RSS feeds for the latest news and updates surrounding Coronavirus.

The digital sanitiser dispenser comes with a 1-year free subscription so all content can be updated via the online CMS portal. This there is no need for external buttons and controls and it even has an automated on/off power timer to reduce the need for contact after installation.

If your internet connection goes offline, you can continue your display by copying your images, videos, and marketing messages onto a USB stick which will play in a continuous loop.

If required, we can upgrade your display to have 4G connectivity, manufactured with a touch screen display, or even customise the colour for you. For more information please contact us on 01733 511030
